THE COTTON SUPPLY IN ENGLAND. be solved by them is the ability of England to cal government at Washington, as administerstand regainst a total consution of imports | ed by Freemont at St. Louis. -and no less troublesome is it to the commerproblem of the SPHYNX propounded to Œntrus. But we are sure that they will not prove so successful in its solution.

The Liverpool corresponden of the London Times, as we notice, writing under date of August the 21st, strives to show that no apprehenslop need be entertained about the realization ceeded the consumption, and that India, China, in the field. Australia and other consuming countries are giusted with supplie, from the English mills. The demand in these markets, it is maintained, ts langual, and nothing but the pressure of more goddscoming in forces the at cks, already there, on an unwilling market at ruinous pricesa fact which we are disposed to doubt, but which, even if admitted, le comparatively of trifling importance, when we come to consider the criginal question in its bearing on British industry. This writer also falls into the deken occasion to expose, of placing reliance upon the alleged probability of obtaining constant and increased supplies of raw material from Egypt, India, Jamaica and other coun-

It is a fact admitted by the Times that the whole American stock of cotton in Liverpoolwhich is about 700,000 bales-will be absorbed

never been depreciated until recently, even by ing statistics on the subject, in an article taken from an English paper called the Cotton Supply Reporter, which appeared in June, 1860. It seems from the statement of this paper that over 500 000 workers are employed in the English factories, and that the number of persons dependent on the cotton trade for subsistence is at least 4,000,000. To its rapid development is attributed the increase of the population of Luncashire from 300 000 persons a century ago to 2,300,000 which it numbers to-

It appears that there were in the United Kingdom, in 1856, 2210 factories, running 28, 000,000 spindles, and 299,000 locms by 97,000 horse power. Since that period, of course, a considerable number of new mills have been ere-ted, and extensive additions have been made to the spinning and weaving machinery of those previously in existence.

The amount of actual capital invested in the cotton trade of the country is estimated at

in 1850, it further appears, that the total value of experts from Great Britain amounted to about \$652,000,000, of which nearly \$240,-Thus more than one third, or one dollar out of every three of British exports consists of cotton. Add to this the proportion of cotton, lions worth of cotton annually. The Cotton Supply Reporter, upon the

strength of these facts, adds with much force : Two conclusions, therefore, may safely be any time break out between England and plant, or other possible causes, our mills would sestapped for want of cotton, amployers would information should reach. coltiers, etc., employed by the mill owners. would lie rotting in their ports, should a the campaign in Missouri. acarcity of the raw material for manufacture

able and dirnified leaders that have for some sime past added so much to its respectability and influence in the community.
